

Designed by our Sailonet design department, the mainsails are produced by partner-sailmakers which have been chosen based on their outstanding production qualities.

This range is particularly adapted for family coastal cruising, charter and bluewater sailing.

The JUPITER range is made of tough Polyester Dacron® with a strength adapted to your sailing style and program.

The furling mainsails of the JUPITER range are equipped as standard with an UV protection by Sunbrella® (acrylic cloth) on both sides of the clew.

The complete equipment (tack and head webbing, furling marks) optimizes and enables easy handling with your furling mainsail.

All sails are sold with their bag, ready to sail.

Two year warranty.
