

Designed by our Sailonet design department, the full batten mainsails are produced by partner-sailmakers which have been chosen based on their outstanding production qualities.

This range is particularly adapted for family coastal cruising, charter and bluewater sailing.

The JUPITER range is made of tough Polyester Dacron® with a strength adapted to your sailing style and program.

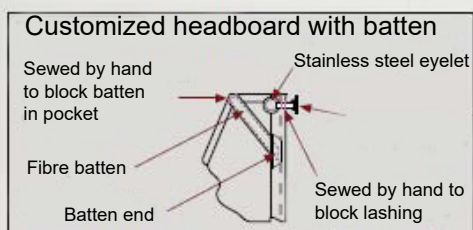

The JUPITER full batten mainsails are equipped as standard with 2 reefs and 4 long battens (for monohulls up to 11.60m).

The complete equipment (radial reinforcements, low friction slider, loose foot, custom headboard with batten, tell tales) optimizes and enables easy handling with your mainsail.

All sails are sold with their bag, ready to sail.

Two year warranty.

### Cross Cut

Nähte zusammengefügt mit 6-fach ZickZack Faden mit UV-Schutz

Reinforced batten pockets  
Monohull: flat battens  
Multihull: round battens

Leech line fixed on camcleat at clew and reef
