

Sailonet

Mainsail Fullbatten, Radial Cut - Venus range

Designed by our Sailonet design department, the full batten mainsails are produced by partner-sailmakers which have been chosen based on their outstanding production qualities.

This range is particularly adapted for offshore cruising, charter and traveling.

The VENUS range is made of Mylar laminated with Taffeta on each side. The radial cut allows using different types of cloth and weights to optimize performance.

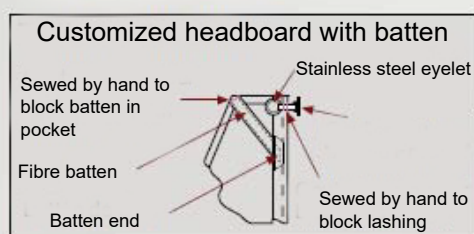

The VENUS full batten mainsails are equipped as standard with 2 reefs and flat battens (round battens as option).

The complete equipment (radial reinforcements, low friction slider, loose foot, batten receiver Sailman, custom headboard with batten, tell tales) optimizes and enables easy handling with your mainsail.

All sails are sold with their bag, ready to sail.

Two year warranty.

Radial Cut

Mylar laminated with double-backed Taffeta, radial cut for better shape control.

Sail delivered with clew webbing or slider

Radial reinforcements

Low friction slider on head board and on each batten

Battreceiver Sailman with low friction slider

Intermediate slider in nylon, lashed with bungee

Reinforced batten pockets
Monohull: flat battens
Multihull: round battens

Trim stripes

Sail with 3 reefs (optional)

Reefing options

Sail with 2 reefs (standard)

Assembled with 6 step zigzag
Uv-protected yarn

Loose foot with outhaul and cleat for easy trimming and fixation of a lazybag.
