## Mainsail Radial Cut - Venus range

Designed by our Sailonet design department, the mainsails are produced by partner-sailmakers which have been chosen based on their outstanding production qualities.

This range is particularly adapted for offshore cruising, charter and traveling.

The VENUS range is made of Mylar laminated with Taffeta on each side. The radial cut allows using different types of cloth and weights to optimize performance.

The VENUS mainsails are equipped as standard with 2 reefs and 4 long battens.

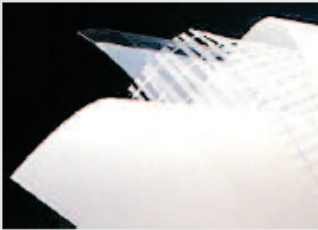

The complete equipment (radial reinforcements, loose foot, custom headboard with batten, tell tales) optimizes and enables easy handling with your mainsail.

All sails are sold with their bag, ready to sail.

Two year warranty.

### Radial cut

Mylar laminated with double-backed Taffeta, radial cut for better shape control. Enhanced performance

#### Tension the battens

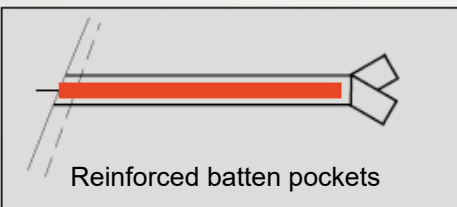

Velcro on this side of the webbing

Velcro on the inside of the batten pocket

Fibre batten pusher

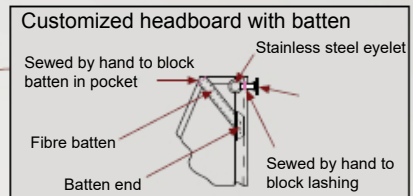

Tell tails under each batten

How does it work? Insert the batten pusher (supplied and tied to the clew) into the webbing pocket at the end of the Velcro strap. With the batten pusher, insert the Velcro tab into the pocket. Push the tab into the pocket until the batten has adequate tension.

Reinforced batten pockets

Radial reinforcements

Customized headboard with batten

Sewed by hand to block batten in pocket

Stainless steel eyelet

Fibre batten

Batten end

Sewed by hand to block lashing

Trim stripes

Assembled with 6 step zigzag Uv-protected yarn

Sail with 3 reefs (optional)

#### Reefing options

Sail with 2 reefs (standard)

Loose foot with outhaul and cleat for easy trimming
