

Sparcraft offers a new range of bowsprits. Easily removed from the deck these innovative spars can be fitted on sailing boats from 25 to 57 feet. They have been specially designed for Gennakers/Code zero or asymmetric Spinnakers. The deck fixing device allows a free foredeck when arriving at the harbour or mooring.

Simple and easy functioning

Deck fixing block

Integrated line stopper

- Easy fixation thanks to an automatic locking device on deck fixing blocks;
- Simple installation (only a short backwards movement is needed to fit the bowsprit on the deck);
- Quick removal and storage on a third fixing block;
- Integrated line stopper for holding the tackline;
- The locking system incorporates an anti-theft device.

Complete kit including :

- Aluminium bowsprit with special end fittings : bridle attachment at the front and fixing block device at the back (delivered pre-installed);
- Adjustable Central fixing collar;
- Deck fixing blocks.

REMOVABLE BOWSPRIT

Ergonomic design

- End fitting has a integral machined sheave;
- Bridle attachment integrated in the front end fitting design;
- The central fixing collar is captive from the bowsprit but it is removable from the fixing block. The foredeck is therefore totally free (no more fixed collar in the way).

Bridles attachment

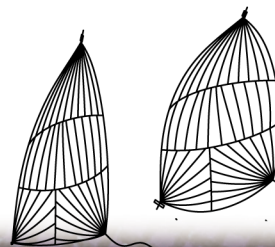

Options

Options	Working deck fitting	"Parking" deck fitting	Deck fitting cover	Stem head fitting	Articulating toggle for gennaker and Code zero furler

The SPARCRAFT bowsprit advantages:

- Easy foredeck installation and removal;
- Automatic locking device for a maximum safety;
- Suitable for a large range of sailboats
- For Code zero and Gennaker

Articulating toggle for Gennaker / Code zero furler attachment,
